Profile

Passionate full-stack developer with hands-on experience building scalable web applications using modern frontend and backend technologies. Strong problem solver with growing exposure to Machine Learning and Cloud platforms, focused on designing maintainable systems and delivering real-world solutions.

Education

Bachelor of Science (Hons) in Software Engineering,

General Sir John Kotelawala Defence University
2022 – 2025

GCE Advanced Level,

Baduriya Central College - Mawanella
2017 – 2019

Stream - Physical Science

Technical Skills

React, Angular, TypeScript, JavaScript, Java, HTML, CSS, TailwindCSS, Redux

SpringBoot, NodeJS, Python(FastAPI)

Oracle Cloud

PostgreSQL, MySQL, MongoDB

SQLAlchemy, Prisma, Hibernate, Git, Postman, Firebase, Supabase

Familiar with - C++, MongoDB, Kotlin, Flutter, Dart, Docker

Work Experience

Full Stack Developer (Trainee Software Engineer),

Codegen International 📍

06/2025 – 12/2025

Revenue Manager – Dashboard Enhancement

- Led the development of a Revenue Manager module integrated into an existing enterprise dashboard.
- Designed and implemented machine learning models for revenue prediction and trend analysis.
- Designed the database schema and implemented it using SQLAlchemy ORM with MySQL, ensuring efficient relational data design and querying.
- Built a scalable backend using Python, FastAPI, and ML libraries for data processing and predictions.
- Developed an interactive frontend using Angular, focusing on usability and performance.
- Contributed to system architecture and technical decision-making, ensuring maintainable and modular backend design.

Tech Stack: Python (FastAPI), Machine Learning, Angular, MySQL, SQLAlchemy

AI-Powered Web Scraping Platform

- Built custom web scrapers for multiple websites and later unified them into a single application capable of scraping data using only a URL input.
- Implemented AI-driven scraping workflows using CrewAI, Crawl4AI, and OpenAI APIs to handle dynamic and diverse website structures.
- Developed the backend using Python and FastAPI, enabling scalable and automated data extraction.
- Persisted scraped data in Oracle Database, designing schemas optimized for large-scale and structured data storage.
- Designed the system to be extensible and reusable across different websites with minimal configuration.

Tech Stack: Python (FastAPI), CrewAI, Crawl4AI, OpenAI API, Oracle Database

Personal Projects

SynapseSign - Secure Attendance System for Universities

Built a secure university attendance system combining PIN verification, Location tracking, WebAuthn-based biometric authentication, and real-time updates via Socket.io to eliminate proxy attendance and improve accuracy.

Tech Stack: React, Express, PostgreSQL, NodeJS, Socket.io, JWT, WebAuthn, Prisma

Personal Skills

- Team Inspiration & Leadership
- Problem Solving & Analytical
- Enthusiastic to learn & Quick Learner
- Self-Motivated & Effective Communicator
- Critical Thinking

Certificates

Java (Basic) Certificate 
HackerRank

CSS (Basic) Certificate 
HackerRank

QTicket – Role-Based Ticket Management System

Developed a full-stack ticket management system with role-based access control, enabling teams to create, assign, and track support tickets. Implemented JWT authentication, dynamic dashboards, and real-time UI updates without page refresh. Built a clean REST API with service-controller architecture and integrated MongoDB Atlas for cloud database management.

Tech Stack: Node.js, Express, MongoDB, Mongoose, React, Redux Toolkit, Axios, React Router, Tailwind CSS, JWT

Shape Designer – Interactive Geometry Visualization System

Developed a full-stack web application for creating, visualizing, and managing geometric shapes in real time. Implemented dynamic rendering with the HTML5 Canvas API and built RESTful services using Spring Boot with validation and MySQL-based persistence.

Tech Stack: React, Java Spring Boot, Spring Data JPA, Tailwind CSS, HTML, Canvas, Hibernate, MySQL

Sudo Write { Thoughts } – Blogging Platform

Built a full-stack blogging platform with role-based access control. Writers get an admin panel, readers can view posts and comment authors, while unregistered users can only browse posts. Implemented authentication, CRUD operations, and a TinyMCE editor. Secured data with JWT and bcrypt.

Tech Stack: React, Express, PostgreSQL, Prisma, Node.js, JWT, TinyMCE

Cloud Nest – Web Based File Storage Service

Developed a secure file storage platform similar to Google Drive, enabling users to upload, organize, and manage files. Implemented user authentication, dynamic folder management, and secure file access using signed URLs. Integrated Supabase for storage and Prisma for database management.

Tech Stack: Node.js, Express, PostgreSQL, Prisma, Supabase, Multer, EJS, TypeScript
