Career Objective

Motivated Computer Science undergraduate with hands-on experience in full-stack web development (MERN stack) and IoT security research, seeking a **Full Stack Developer** position where I can apply my skills in building robust, scalable, and secure web applications, from database design through to responsive front-end interfaces.

Education

University of Vavuniya, Sri Lanka

2022 – 2026

BSc (Hons) in Computer Science

Experience

PineappleAI

Feb 2026 – Jul 2026

Full-Stack Engineer Intern (MERN Stack)

- Worked on an internal ERP system using the MERN stack (MongoDB, Express.js, React, Node.js).
- Developed RESTful APIs and backend services, and built responsive React front-end interfaces for core ERP modules.
- Collaborated with cross-functional teams on database design, debugging, and feature deployment in an agile environment.

Research Experience

University of Vavuniya

Oct 2025 – Jul 2026

Undergraduate Research Project

- **Research Title:** Secure and Efficient ECDHE Based IoT Framework for Monitoring Cold Storage in Hospital Pharmacies.
- Designed a secure IoT monitoring framework applying ECDHE key exchange for confidentiality, integrity, and authentication between devices and cloud services.
- Integrated ESP32, DHT11 sensors, MQTT, AWS IoT Core, Lambda, and DynamoDB for real-time monitoring, evaluating system performance and latency.

Technical Skills

- **Frontend Development:** HTML5, CSS3, JavaScript (ES6+), React, Bootstrap, Responsive Design, UI/UX Fundamentals
- **Backend Development:** Node.js, Express.js, PHP, Python, RESTful APIs, Server-Side Logic, Authentication & Authorization
- **Databases:** MongoDB, MySQL, Database Design, CRUD Operations, DBMS Concepts
- **Tools & Platforms:** Git, GitHub, AWS IoT Core, AWS Lambda, DynamoDB, Chrome Extensions API, Axure RP9, WordPress
- **Additional Knowledge:** Web Security Basics, Secure Data Handling, Introductory Machine Learning Concepts

Projects

- **ChillCore – Secure IoT Pharmaceutical Cold-Chain Monitoring System:** Built a full-stack IoT monitoring system using ESP32, AWS IoT Core, Lambda, and DynamoDB, with ECDHE/HKDF/ChaCha20-Poly1305 encryption over MQTT/TLS and a real-time JavaScript dashboard.
- **StudyTube Protector – Chrome Extension:** Developed and published a Chrome extension to improve learning focus by hiding distracting YouTube content, using DOM manipulation and the Chrome Extensions API.
- **DigiCart LK – Full Stack E-Commerce Website:** Built a full-stack e-commerce web application using PHP, MySQL, JavaScript, HTML, and CSS, with authentication, product management, cart, and order processing.
- **Online Seat Booking Management System:** Backend-driven web app using Python and MySQL with authentication, real-time seat availability, and booking confirmation.
- **Lucky Wheel UI/UX Prototype:** Interactive UI prototypes in Axure RP9, with usability testing and feedback-driven refinement.

Certifications & Activities

- **Gemini Certified Student** – Google (Nov 2025 – Nov 2028)
- **Certificate in Responsive Web Development** – University of Jaffna (2024)
- **Prompt Engineering for ChatGPT** – Great Learning Academy (2024)
- **Volunteer – ELEVATE Program:** Recognized with Certificate of Appreciation for community engagement (2025)

Languages

Tamil: Native

English: Professional Working Proficiency
