SUMMARY

Final Year Software Engineering graduate from SLIIT, recently completed all academic requirements, awaiting graduation. Brings hands-on internship experience in full-stack and HRIS development, with a growing focus on DevOps and DevSecOps practices. Experienced across Java, React, Node.js, Docker, Kubernetes, and Azure — eager to contribute to high-impact engineering teams.

EDUCATION

Sri Lanka Institute of Information Technology (SLIIT) <i>BSc (Hons) in Information Technology – Specializing in Software Engineering</i>	2022 – 2026 Graduated
Royal College, Horana <i>GCE Advanced Level – Physical Science</i>	Completed

EXPERIENCE

Intern – HRIS Development <i>Earthfoam (Pvt) Ltd</i>	Jul 2025 – Jan 2026 <i>Horana, Sri Lanka</i>
- Debugged and refined critical HRIS modules, resolving logic errors in Overtime, Night Shift, and No-Pay calculations to achieve 100% payroll accuracy. - Optimized leave submission process by diagnosing bottlenecks, significantly improving system responsiveness for end-users. - Deployed “Individual Shift Allocation” feature and conducted end-user training to ensure successful system adoption.	
Intern – Software Developer <i>eSupport Technologies (Pvt) Ltd</i>	Dec 2024 – Jun 2025 <i>Borella, Colombo 08</i>
- Engineered a full-stack betting platform using React.js and Laravel PHP with secure financial transaction logic, user authentication, and administrative dashboards. - Contributed to a React.js/Node.js e-commerce site and an ASP.NET POS system with SQL Server and MySQL database integration. - Participated in Agile ceremonies including daily stand-ups, sprint planning, and peer code reviews to ensure code quality.	

PROJECTS

NeuroMentor: Hybrid AI Code Assistant <i>Final Year Research Project</i>	2025
- Engineered a 3-tier backend for a VS Code extension integrating a Rule Engine, fine-tuned CodeBERT, and Gemini GenAI for real-time detection of syntax, logical, and semantic errors in C programs. - Tech: Python, FastAPI, PyTorch, CodeBERT, Gemini AI, MongoDB, TypeScript, VS Code API - github.com/VKaushalya03/NeuroMentor-Project	
BookStore – Cloud-Native Microservices Application <i>Academic DevSecOps Project</i>	2026
- Full-stack bookstore with five independent microservices, an API Gateway, and a Next.js frontend deployed on Azure Container Apps with a complete DevSecOps pipeline. - Implemented JWT auth, Helmet.js, CORS, rate limiting, non-root Docker containers, and SonarCloud SAST scanning across all services. - Configured GitHub Actions CI/CD with automated build, security scan, and deployment to Azure Container Registry (ACR). - Tech: Node.js, Express, Next.js, Docker, Azure Container Apps, GitHub Actions, SonarCloud, JWT - github.com/DinethRashmikaHeshan/ctse_bookstore_app	
Cloud-Native Food Ordering & Delivery System <i>Academic Project</i>	2024
- Microservices-based platform with real-time restaurant discovery, order management, and delivery tracking. Deployed with Docker and Kubernetes for scalability and high availability. - Tech: ReactJS, ExpressJS, MongoDB, Docker, Kubernetes - github.com/DinethRashmikaHeshan/food-delivery-system	

TECHNICAL SKILLS

Languages: Java, JavaScript, Kotlin, C/C++, PHP, HTML/CSS, SQL

Frameworks & Libraries: React, React Native, Node.js, Next.js, Express, Laravel, ASP.NET, FastAPI

DevOps & Cloud: Docker, Kubernetes, Azure Container Apps, GitHub Actions, SonarCloud, Git

Databases: MongoDB, MySQL, SQL Server

AI/ML: PyTorch, CodeBERT, Hugging Face, NumPy/Pandas, Gemini AI

Design: Figma

CERTIFICATIONS

Frontend Developer (React) – HackerRank

SQL (Intermediate) – HackerRank

Software Engineer Intern – HackerRank
