WORK EXPERIENCE

Business Analyst, 2016 - Present

Capgemini

- Worked on complex problems where analysis of situations and data requires an evaluation of intangible variance factors.
- Acted as a liaison between departmental end-users, technical analysts, information technology analysts, consultants and other governmental organizations in the analysis, design, configuration.
- Performed analysis to identify root cause and created solutions for all types of business problems in the MS environment.

Business Analyst, 2014 - 2016

Bank of America

- Analyzed the feasibility of, and developed requirements for new systems and enhancements to existing systems.
- Created and maintained network and business performance forecasts based on advanced statistical analysis and modeling.
- Acted as the interface between the client and the development team, ensuring all the requirements were translated into a working system to meet the requirements of the client.

Business Analyst, 2012 - 2014

The Rehancement Group

- Assisted with knowledge transfer, information gathering, BRD / FRD preparation, ETL / data mapping, configuration, changes, testing.
- Created sustainable business processes and established a foundation for automation to increase efficiency.
- Provided leadership for the team, recruitment, training and mentoring of teams.
- Researched and prepared statistical reports using data from court computer systems and internal surveys.
- Tracked and fully documented changes for functional and business specifications.
