PROFILE

A passionate and determined Software Engineering undergraduate, pursuing a Software Engineering degree at the Informatics Institute of Technology, Sri Lanka, affiliated with the University of Westminster, UK. Familiar with languages and technologies like Python, Java, Flask and SQL and interested in full-stack development, motivated to learn new technologies and use them to solve real-world problems. Looking forward to working with industry professionals, contributing to the team, and gaining valuable industry experience.

EDUCATION

BEng (Hons) Software Engineering 09/2024 – Present
University of Westminster

Foundation Certificate in Higher Education 09/2023 – 09/2024
Informatics Institute of Technology
Completed the Foundation with a Merit pass.

G.C.E. Ordinary Level (2022) 01/2012 – 06/2023
Nalanda College
Got 7 A's and 2 B's. 'A' pass for English and 'B' pass for Mathematics.

PROJECTS

Teera 09/2025 – 03/2026
Teera is an AI-powered mobile application for the Cinnamon farmers with the ability to predict the spreading location of the identified disease and give recommended treatment options for the identified disease.

Used Technologies

Frontend – React Native, Typescript, Expo

Backend

Core Framework - Flask (Python), Flask-CORS

Machine Learning – TensorFlow (CNN Model), NumPy, Keras

Portfolio Website 04/2026
Develop a portfolio website to showcase my skills and projects and as a platform to others to reach out to me.

Used Technologies - React

Life Below Water 03/2025
A user-friendly, informative website designed to give a message about the 14th UN Sustainable Development Goal, Life Below Water, created with the group G1-9 in 1st year. Showcase about marine life, climate change, etc.

Used Technologies - HTML, CSS

FixIT

04/2025 – 07/2025

FixIt is a Flutter mobile application prototype designed to connect homeowners with verified repair professionals for quick and reliable home maintenance services. Users can explore service categories such as plumbing, electrical, carpentry, and appliance fixing, and navigate the booking process through an intuitive interface.

Used Technologies - Flutter, Dart

Traffic Flow Manager

10/2024

A traffic flow management system that fetches traffic data from two junctions. The goal is to create a system that helps the municipal council members to take better decisions and manage the ongoing traffic in those junctions.

Used Technologies – Python

SKILLS

Technical Skills

- Python
- Java
- HTML
- CSS
- SQL
- Git
- GitHub
- Flask
- React

Soft Skills

- Communication
- Presentation Skills
- Teamwork – Worked with teams collaboratively since the foundation and recently worked with SDGP team.
- Adaptability
- Empathy

CERTIFICATES

- | | | |
|--|---|--|
| • Python Essential Training (2018) ↗ | • Artificial Intelligence Foundations: Machine Learning ↗ | • Java Object-Oriented Programming ↗ |
| • Flask Essential Training ↗ | | |

COMPETITIONS

Hult Prize 2026 - Participant

02/2026

Got the opportunity to present the potential of our AI-powered Cinnamon Disease Detection app, Teera, at the Hult Prize 2026 Qualifier Round and gained valuable insights to improve our project further.

Codesprint X 2025 - Participant

04/2025 – 07/2025

Created the prototype app, FixIT, to compete in the Codesprint X and presented the work.
