PROFESSIONAL SUMMARY

Final-year BICT Software Technologies undergraduate with hands-on experience developing, testing, and deploying software applications. Skilled in PHP, Laravel, React.js, Node.js, C#, REST APIs, databases, testing, Docker, and cloud technologies. Experienced in MVC architecture, OOP, SDLC, and Git-based development workflows.

TECHNICAL SKILLS

Languages: PHP, JavaScript, TypeScript, C#, Python, SQL

Frameworks: Laravel, React.js, Next.js, Node.js, NestJS, .NET Framework, Bootstrap, Tailwind CSS

Software Engineering: OOP, MVC Architecture, REST APIs, SDLC, Authentication, Database Design

Databases: MySQL, PostgreSQL, MongoDB, SQLite, Eloquent ORM

Testing & Tools: PHPUnit, Postman, Manual Testing, Git, GitHub, Docker, VS Code

Cloud: Microsoft Azure, AWS, Render, Railway, Vercel, Linux

PROJECTS

StyleCart - Full Stack Fashion E-Commerce Platform

May 2026 – July 2026

Software Engineering Project

Laravel, React.js, REST API, MySQL

- Developed full-stack e-commerce application using React.js frontend and Laravel REST API backend.
- Implemented authentication, product management, cart, checkout, and order processing features.
- Designed database models using Laravel MVC, Eloquent ORM, and performed PHPUnit/Postman testing.

Cloud-Based Vehicle Rental Management System

Jan 2026 – Mar 2026

Cloud Software Application

Laravel, PHP, Azure, MySQL

- Developed Laravel-based vehicle rental system with authentication, CRUD operations, and booking workflows.
- Designed MySQL database models using MVC architecture and Eloquent ORM.
- Deployed using Microsoft Azure App Service and integrated email notifications.

C# Windows Forms Applications Collection

2026

Advanced Software Engineering Coursework

C#, .NET Framework

- Developed four desktop applications using Windows Forms with OOP, validation, event-driven programming, and data structures.
- Used Visual Studio, Git, and GitHub for development and version control.

SOFTWARE DEVELOPMENT EXPERIENCE

Software Developer - Academic Projects

2024 – Present

Software Engineering Projects

Sri Lanka

- Developed applications using SDLC concepts, MVC architecture, and structured development practices.
- Built APIs, authentication systems, database solutions, and tested application functionality.

EDUCATION

South Eastern University of Sri Lanka

2022 – 2027

Bachelor of Information and Communication Technology (BICT)

Software Technologies Specialization

CERTIFICATIONS

- AWS Academy Graduate - Cloud Web Application Builder (2026)
- AWS Academy Graduate - Cloud Foundations (2025)
- AWS Academy Graduate - Generative AI Foundations (2025)
- Python Essentials 1 - Cisco Networking Academy (2026)
