### TECH SKILLS

- Python
- Java
- C++
- C
- PHP
- Kotlin
- Github
- SQL, MySQL
- Machine Learning
- R
- Excel
- Tableau
- Power BI
- Statistics
- MongoDB
- Numpy
- Pandas
- Tensorflow

### PROFILE

I'm a student working towards a Bachelor of Information Technology focused on Data Science. I'm an enthusiastic team player that willing to accept challenges and bear up responsibilities. I'm a hard-working individual that love to learn new skills and improve existing skills. I have a clear, logical mind for problem-solving and am able to work under pressure. I can make a significant contribution to the operations and overall success of the organization I am affiliated with.

### EDUCATION

- **Sri Lanka Institute of Information Technology (SLIIT)**  
BSC (HONS) IN INFORMATION TECHNOLOGY 2023-2026
- **WP/KE Karunarathne Buddhist National College**  
G.C.E ADVANCED LEVEL - TECHNOLOGY  
Engineering Technology - C  
Science for Technology - S  
ICT - S
- **St. Anthony's College, Wattala**  
G.C.E ORDINARY LEVEL (2019)

### PROJECTS

#### End-to-End Data Analytics Project – Retail Customer Behavior

This project involved analyzing retail customer behavior using Python, SQL, and Power BI to understand purchasing trends and customer patterns. The work included data cleaning, exploratory data analysis (EDA), and KPI analysis using Pandas and NumPy. An interactive Power BI dashboard was created to visualize key business metrics and insights. The complete end-to-end project was documented and published on GitHub..

**Technologies:** Python, SQL, Power BI, Pandas, NumPy, GitHub  
**Git Hub :** [https://github.com/tharindu43/customer\\_data](https://github.com/tharindu43/customer_data)

## SOFT SKILLS

- Teamwork
- Time Management
- Leadership
- Effective Communication
- Critical Thinking

## LANGUAGES

- Sinhala
- English

### Ayurvedic Hospital Management System

For the Web Application Development module, I developed an Ayurvedic Hospital Management System using the MERN stack. The system facilitates efficient management of patient details, doctor appointments, treatment records, and billing through a responsive and user-friendly web interface.

**Technologies Used:** MongoDB, React.js, Express.js, Node.js, Firebase  
**Git Hub :** [https://github.com/NandunSenanayaka/ITP\\_Full\\_Project](https://github.com/NandunSenanayaka/ITP_Full_Project)

### HomeStock Management System

I developed a system that helps users efficiently track household items, manage grocery lists, receive expiry and stock alerts, & monitor grocery spending. The system allows users to add, update, and remove inventory items with details such as quantity etc. It also features automated grocery list generation based on stock levels, real-time alerts for expiring or low-stock items, and a budgeting tool to track and manage grocery expenses—all through an intuitive and user-friendly web interface.

**Technologies Used:** MongoDB, React.js, Express.js, Node.Js, Azure  
**Git Hub :** <https://github.com/tharindu43/home-stock>

### Cricket Data Analytics Project using Python and Power BI

Developed a cricket analytics dashboard using data scraped from ESPNcricinfo during the T20 World Cup 2022. Utilized Bright Data's proxy-based scraping tools to extract match and player statistics, then cleaned and transformed nested JSON data into structured CSV files using Python and Pandas. Built interactive dashboards in Power BI with DAX measures to analyze player performance across roles such as openers, finishers, and bowlers.

**Technologies Used:** Python, Pandas, Power BI, Statistics

## CERTIFICATES
