

S.P SACHINTHA NIMESH

INTERN SOFTWARE ENGINEERING

Chilaw , North Western Province | +94776530084 | sachinthanimesh370@gmail.com | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

PROFILE SUMMERY

Motivated Software Engineering undergraduate with a passion for designing and developing scalable, high-performance software solutions. Proficient in **Java, Spring Boot, RESTful APIs, microservices, and full-stack development**, with a strong foundation in **Object-Oriented Programming (OOP), SOLID principles, data structures and algorithms, design patterns**, and clean code practices. Experienced with modern software engineering methodologies, **software testing DevOps fundamentals, CI/CD pipelines, Docker, Kubernetes, Terraform, Ansible, AWS cloud services**, and automation tools such as **n8n**. Passionate about building secure, maintainable, and efficient software systems while continuously exploring emerging technologies and industry best practices.

EDUCATIONAL QUALIFICATIONS

Bachelor of Science in Computer Engineering

2022 to Present

University of Jaffna, Sri Lanka

TECHNICAL SKILLS

- **Languages** : Java, JavaScript , TypeScript, C#, PHP, C, C++, Python
- **Frameworks & Libraries** : Spring Boot, React.js, Next.js, ASP.NET Core, React Native, NestJS, Express.js, Laravel, Bootstrap, Material-UI, Tailwind CSS
- **Databases** : MySQL, MongoDB, PostgreSQL
- **Cloud Services** : AWS, Terraform, Kubernetes, Docker, Ansible
- **Microservices & Architecture** : Eureka, Apache Kafka, Spring Cloud Gateway, Keycloak
- **DevOps & CI/CD Tools** : Jenkins, GitHub Actions, CI/CD Pipelines
- **Automation & Integration** : n8n
- **Tools & Platforms** : Git, Postman, MATLAB, WordPress

SOFT SKILLS

- Problem Solving
- Self-Leaning Ability
- Time Management
- Teamwork & Collaboration
- Leadership
- Emotional Intelligence

PROJECTS

01 Hostel Management System

2025

A full-stack web application designed to manage university hostel operations, including room allocation, user role management, and room occupancy monitoring.

- **React Web Application:** [code](#) 
Built a mobile-responsive, role-based web application using ReactJS, Vite, Material-UI (MUI), and Styled Components, featuring dynamic dashboards for Admin, Warden, Security, and Student roles. Integrated JWT secured authentication, role-based routing, and Axios for API communication. Implemented real-time room occupancy tracking, interactive charts, date pickers, and performance-optimized virtualized lists for a seamless user experience across devices.
- **Spring Boot Backend:** [code](#) 
Developed robust RESTful APIs using Spring Boot, Hibernate (JPA), and ModelMapper to handle user role management, room allocation, and occupancy tracking. Implemented Spring Security with JWT authentication to enforce secure access control across multiple user roles. Ensured real-time data consistency and reliability to support dynamic hostel operations.
- **NestJS Backend:** [code](#) 
Integrated Meta WhatsApp Business API and GPT-4.0 mini, enabling students to submit complaints via WhatsApp and receive context-aware, AI-generated responses through automated complaint processing.

Technologies: Spring Boot, ReactJS, NestJS, MySQL, Docker, JPA, ModelMapper, Lombok, Axios, Mui, Postman,JWT,Meta WhatsApp Business API, OpenAI GPT-4.0 mini

A full-stack system designed to automate and secure student attendance tracking through real-time GPS data validation.

- **React Native Mobile Application:** [code](#) 
Developed a mobile-responsive Android attendance app using React Native CLI, featuring GPS-based location tracking via react-native-community/geolocation. Integrated with a Spring Boot backend through Axios and RESTful APIs. Implemented structured stack and drawer navigation using React Navigation, ensuring smooth user flow and consistent performance across Android devices.
- **React Web Application:** [code](#) 
Built a responsive lecturer dashboard using React and Material-UI (MUI) with modern, adaptive UI components. Integrated with a Spring Boot backend via Axios for secure and efficient data fetching. Implemented react-router-dom to enable smooth client-side routing and seamless navigation.
- **Spring Boot Backend:** [code](#) 
Implemented attendance logic with GPS validation and RESTful APIs. Used JPA/Hibernate with MySQL, DTO mapping via ModelMapper, API documentation with Swagger, and tested APIs with Postman.

Technologies: Spring Boot, React, React Native, MySQL, JPA, ModelMapper, Swagger, Lombok, Postman

03 Inventory Management System (Group Project)

2026

An enterprise-grade full-stack inventory management system architected to automate inventory governance, procurement approval pipelines, asset lifecycle management, equipment issuance, preventive maintenance, audit logging, and secure multi-role access control across university department

- **Spring Boot Backend:** [code](#) 
Built scalable RESTful APIs with Spring Boot, Spring Security, JPA (Hibernate), and MySQL, implementing layered architecture, DTO mapping, repository pattern, JWT authentication, RBAC, transactional processing, audit logging, workflow engine, exception handling, and optimized relational database operations.
- **React Web Application:** [code](#) 
Developed a modular SPA using ReactJS, TypeScript, Vite, Tailwind CSS, shadcn/ui, Axios, and TanStack React Query, implementing JWT authentication, RBAC, protected routing, RESTful API integration, client-side caching, dynamic dashboards, procurement workflows, maintenance tracking, responsive UI, and schema-based form validation.
- **Development Methodology:**
Developed following Agile Scrum methodology, participating in sprint planning, backlog refinement, sprint reviews, collaborative Git workflows, and iterative software delivery.

Technologies: Java 17, Spring Boot, Spring Security, Spring Data JPA (Hibernate), MySQL, ReactJS, TypeScript, Tailwind CSS, JWT, Lombok, ModelMapper, RESTful APIs, Docker, Git, Postman

VOLUNTEERING

IESL Member

2023 – Present

Actively participated in IESL-organized projects like techno exhibition, applying engineering knowledge to solve real world problems while developing leadership abilities.
