

IMESH HARSHANA

Project Management & Business Analysis Intern Candidate | Full-Stack Developer

imesh0940@gmail.com | +94 743 095 661 | Malabe, Sri Lanka | LinkedIn: [Imesh Harshana](#) | GitHub: [Imesh Bandara](#)

PROFESSIONAL SUMMARY

IT undergraduate at SLIIT with hands-on experience leading full-stack web projects from requirements gathering through live deployment. Coordinated 10+ projects end-to-end — managing timelines, scope, and stakeholder communication — with 2 systems currently running in production. Skilled in translating business requirements into actionable project plans and driving crossfunctional execution. Founder of KuppiLab, an educational platform supporting Sri Lankan university students. Seeking a Project Management or Business Analysis internship to bring organizational rigor, stakeholder management, and a proactive work ethic to an innovative team.

EDUCATION

B.Sc. (Hons) in Information Technology | Sri Lanka Institute of Information Technology (SLIIT) 2023 – Present

- Relevant coursework: Software Engineering, Business Analysis, Database Management, Web Technologies, Object-Oriented Programming
- Active contributor to the SLIIT tech community; organised peer-learning and tutorial sessions for fellow students

KEY PROJECTS

Smart Tour Management System – Air B & C | Project Lead | Business Analyst | System Designer

Flask, PostgreSQL, Flutter / [airbnctours.com](#)

- Led design and development of a full tour booking and transportation management platform, owning the project from concept to delivery
- Collaborated with stakeholders to elicit requirements, define project goals, and map functional workflows
- Coordinated technical tasks across the team and supported key architectural decisions
- Planned features and implementation schedules to keep delivery aligned with milestones and business needs
- Maintained documentation of requirements, decisions, and progress throughout the project lifecycle

ND Apparel | E-Commerce Platform

PHP, MySQL, Bootstrap, JavaScript | [nd-apparel.great-site.net](#)

- Managed end-to-end delivery of a full-stack e-commerce platform: product catalogue, shopping cart, order management, and admin dashboard
- Deployed to a live production environment via cPanel; currently serving real customers

KuppiLab | Founder & Project Lead

PHP, MySQL, JavaScript, YouTube API | [kuppilab.is-best.net](#)

- Founded and led development of an educational platform integrated with the YouTube API, delivering free tutorial sessions to university students across Sri Lanka
- Directed platform scope covering structured learning resources, video embeds, and student engagement tools; live in production

Doctor Channeling Mobile App | Kotlin, Android

- Coordinated design and build of an Android app enabling patients to browse doctors, book appointments, and manage channeling sessions
- Applied Material Design guidelines, combining mobile development with healthcare domain requirements

Event Planner Desktop Application | Java

- Managed scope and delivery of a desktop event management system covering scheduling, attendee management, and task tracking

- Applied object-oriented design patterns to keep the system maintainable and extensible

8 Additional Web Systems | LAMP Stack, MERN Stack

- Delivered systems across multiple domains — inventory management, student portals, service booking, and restaurant management

EXPERIENCE

YouTube Content Creator & Educator | [KuppiLab](#) YouTube Channel

2025 – Present

- Plan and manage the full content pipeline — planning, recording, editing, publishing, and community engagement — for IT tutorial content aimed at university students
- Analyse viewer metrics and engagement data to inform content strategy and improve audience retention

Full-Stack Web Developer | Freelance and Academic Projects

2023 – Present

- Managed 10 web projects from requirements gathering through to production go-live, acting as primary point of coordination
- Hosted and maintain 2 production applications (ND Apparel and KuppiLab) on cPanel-based hosting
- Gathered business requirements directly from stakeholders and translated them into technical specifications
- Applied Agile methodologies — sprint planning, iterative development, and user acceptance testing — across project delivery

SKILLS

Project & Business Analysis: Requirements Elicitation, Use Case Modelling, Process Mapping, User Story Writing, Agile, Scrum, Stakeholder Management

Programming Languages: JavaScript, PHP, Python, HTML, CSS, SQL

Frameworks & Libraries: React.js, Node.js, Express.js, Angular, Flask, Bootstrap, Tailwind CSS
