PROFESSIONAL SUMMARY

Friendly and driven Junior Software Developer who enjoys building things people actually love to use. Skilled across the MERN stack, Next.js, and Laravel, with hands-on experience shipping cloud-based applications at Spark Global Solutions while completing a BIT degree at the University of Moratuwa. Curious about AI-powered products, always learning, and happiest when solving real problems with clean, scalable code.

EDUCATION

University of Moratuwa

Bachelor of Information Technology (BIT)

Sri Lanka

Reading

- **Key Subjects Learned:** Data Structures & Algorithms, Software Engineering Fundamentals, Database Management Systems, Object-Oriented Programming, Project Management, Web Technologies, Artificial Intelligence & Machine Learning
- Built a strong foundation in designing efficient algorithms, structuring relational and non-relational databases, and managing software projects end-to-end from planning through delivery.

Institute of Technology (ITUM), University of Moratuwa

National Diploma in Technology – Information Technology

Sri Lanka

2024 - 2026

- **Key Subjects Learned:** Data Structures & Algorithms, Fundamentals of Software Engineering, Database Management Systems, Project Management, Object-Oriented Programming, Cloud Computing, UI/UX Design
- Applied coursework through practical projects covering full-stack development, cloud deployment basics, and user-centered design principles.

WORK EXPERIENCE

Spark Global Solutions

Software Developer & UI/UX Designer

Sri Lanka

Feb 2026 – Completed

- **UI/UX Designer and Software Developer Intern**, taking on greater ownership of design and development across client projects.
- Designed and developed marketing landing pages, streamlining the design to deployment workflow and reducing development turnaround time by approximately 30%.
- Developed enterprise modules supporting Employee Management and Service Management workflows for internal and client facing applications, owning both UI/UX design and full-stack implementation.
- Contributed to full stack web features using React.js, Next.js, Node.js, and Express, improving application performance and user engagement.
- Integrated third-party APIs and RESTful services (including Hikvision system integrations), optimising data retrieval patterns with RTK Query against PostgreSQL
- Containerised application environments using Docker, streamlining development and deployment workflows across the team.
- Collaborated with cross-functional teams to gather requirements, produce technical documentation, and deliver iterative releases on schedule following Agile/Scrum practices.

PROJECTS

LearnEzy AI | *React, Node.js, Express, Supabase, Google Gemini AI* May 2026 – Present

- Built a SaaS AI-powered learning and exam preparation platform for University, GCE A/L, and Professional Certification students, associated with Spark Global Solutions (Pvt) Ltd.
- Leveraged Google Gemini AI to transform study materials (PDFs, DOCX, PPTX, images, text) into AI-generated exam-focused quizzes with explanations, spaced-repetition flashcards, and intelligent study summaries.
- Developed a real-time AI Tutor providing contextual learning assistance through streaming conversations, built on a scalable full-stack architecture to improve knowledge retention and exam readiness.
- **Live Demo:** learn-ezy-ai.vercel.app | **GitHub:** LearnEzy AI

Kapruka Genie – AI Assistant | *React, TypeScript, Vite, Framer Motion, JSON-RPC* May 2026 – Jul 2026

- Built an AI-powered gifting concierge and multi-agent event planner interfacing with Kapruka's e-commerce backend via the Model Context Protocol (MCP).
- Architected a custom AI Gateway in TypeScript to detect user intent, manage session state, and route messages to specialized agents (Gift Detective, Wedding Planner, Event Coordinator).
- Implemented JSON-RPC 2.0 communication over HTTP to invoke live MCP tools for product search, regional delivery validation, guest checkout creation, and shipment tracking.
- Developed a custom weighted compatibility score engine (Interest 40% / Budget 30% / Occasion 20% / Popularity 10%) to rank gift recommendations, paired with a glassmorphism UI featuring personality quizzes and a gift bundle builder.
- **Live Demo:** kapruka-ai-assitant.vercel.app | **GitHub:** Kapruka-Ai-Assitant

MerchHub.lk | *React, Node.js, MongoDB* 2026

- Developed MerchHub.lk, an e-commerce merchandise platform enabling users to browse products, manage carts, and complete secure checkout with a responsive, user-friendly interface.
- Built RESTful APIs for product catalogue, cart, and order management, with a focus on clean UI/UX and smooth end-to-end shopping flow.
- **Live Demo:** merchhub.lk | **GitHub:** Merchhub.lk

JustPark.lk | *JavaScript, Node.js, MongoDB, IoT (MQTT)* 2025

- Developed an IoT-based smart parking management system for urban areas enabling real-time slot availability tracking, reservations, and automated billing.
- Integrated hardware sensor data via MQTT protocol with a web dashboard for parking operators and end-users.
- **GitHub:** JustPark.lk

Additional Projects: HasthiRaksha (Project Save Elephants), AuraStore AI, Nena Diriya, PlayHunt Browser Extension.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, PHP, SQL

Frontend: React.js, Next.js, Tailwind CSS, Bootstrap

Backend: Node.js, Express.js, Laravel, REST APIs

Databases: MongoDB, MySQL, Supabase, Firebase

DevOps: Docker, Git, GitHub Actions

Other: MQTT, JWT, RTK Query, Figma, Postman

CERTIFICATIONS

Software Engineer – HackerRank	Issued Apr 2026
Data Structures and Algorithms – Simplilearn	Issued Oct 2025
Git & GitHub Mastery – Microsoft Learn Student Ambassadors, Sri Lanka	Issued Oct 2024
Web Design for Beginners – University of Moratuwa	Issued Sep 2025
UI/UX for Beginners – Great Learning	Issued Jun 2024

ACHIEVEMENTS & INVOLVEMENT

Participated in the Dextron Robotics Competition at ITUM, University of Moratuwa.
Member of the Computer Society, ITUM, University of Moratuwa.
Member of the Zero Plastic Club, ITUM, University of Moratuwa.
