📍 38/1, Somasundaram Avenue, Jaffna

🌐 [Sharan Kugathasan](#)

SUMMARY

Information Technology undergraduate specializing in Data Science at the Sri Lanka Institute of Information Technology (SLIIT), with hands-on experience in software development, web applications, database management, and AI-powered systems. Skilled in Java, Python, JavaScript, React, Node.js, Spring Boot, SQL, and MongoDB, with experience developing full-stack applications and REST APIs. Familiar with software development practices, Git/GitHub, Agile collaboration, UI/UX design, and problem-solving. Passionate about building reliable, user-focused software solutions and eager to contribute to a professional software engineering team.

EDUCATION

Sri Lanka Institute of Information Technology (SLIIT)

Sep 2022 - Present

BSc (Hons) in Information Technology Specialized in Data Science

Jaffna Hindu College

G.C.E Advance Level Examination (2018 - 2020) : **3 Passes - Biological Stream**

G.C.E Ordinary Level Examination (2017) : **9A, English Literature (A)**

PROJECTS

Power Gym – AI-Enabled Gym Management System

- Developed the Schedule Management module with schedule creation, editing, filtering, and reporting features.
- Designed responsive UI prototypes using Figma and collaborated with the team using Git/GitHub in an Agile environment.
- Technologies: MERN Stack, TypeScript, Tailwind CSS, Material UI, Figma

Syntax – Online Vehicle Spare Parts Management System

- Developed core features for the Supplier Management module, including web pages and database functionality.
- Collaborated with team members to implement and test application features.
- Technologies: Java, HTML, CSS, JavaScript, MySQL, Eclipse, Apache Tomcat

Votify – Online Voting System

- Developed the User Management module and contributed to multiple web pages as part of a five-member development team.
- Implemented user-related functionality and database integration.
- Technologies: PHP, HTML, CSS, JavaScript, MySQL, Apache XAMPP

Personalized Recommendation System for E-commerce

- Developed a recommendation system combining collaborative, content-based, and popularity-based approaches.

- Built REST APIs using FastAPI and integrated them with a React frontend and PostgreSQL database.
- Technologies: Python, Scikit-learn, FastAPI, React, PostgreSQL

Legal Vision – AI-based Legal Knowledge Graph Builder (Research Project)

- Developed a pipeline to transform unstructured legal documents into structured knowledge graphs.
- Implemented entity and relationship extraction to support information retrieval and RAG.
- Technologies: Python, NLP, Machine Learning, Knowledge Graphs, RAG

Smart Library Monitoring System

- Developed a real-time monitoring system integrating IoT sensors, backend services, and a React dashboard.
- Implemented real-time data synchronization and analytics using Firebase.
- Technologies: ESP32, Firebase, React.js, Node.js, Python

Employee Attrition Prediction System

- Developed a machine learning application with data preprocessing, feature engineering, and classification models.
- Built a web interface using Django and React to visualize prediction results.
- Technologies: Python, Scikit-learn, Django, React

SKILLS

Programming Languages

- Java, Python, JavaScript, TypeScript, C++, Kotlin, PHP, SQL

Web & Software Development

- React.js, Node.js, Express.js, Spring Boot, Django, FastAPI, HTML, CSS, REST APIs

Databases

- MySQL, PostgreSQL, MongoDB, SQLite, SQL Server

Development Tools

- Git, GitHub, Visual Studio Code, Eclipse, Android Studio, Apache XAMPP, Apache Tomcat

UI/UX & Design

- Figma, Tailwind CSS, Material UI

AI & Machine Learning

- Machine Learning, NLP, Recommendation Systems, Knowledge Graphs, RAG, Scikit-learn

Other

- Problem Solving, Analytical Thinking, Team Collaboration, Communication, Leadership, Time Management
